

Paint Record Card

The information you will want in three years.

Tape this inside a cupboard door or the back of the airing cupboard. When you need to touch up a scuff or match a wall, everything the paint counter asks for is on this sheet — and the tin will be long gone.

[illegible]

WORTH WRITING DOWN TOO

- The tinting base, not just the color — two bases can carry the same color name
- Which wall got which color, if the room has more than one
- Whether it was primed first, and with what
- The finish: flat, eggshell, satin, semi-gloss. Touch-ups in the wrong sheen show badly.
